Now everything computes.™

In an ever-changing environment, IT professionals must stay ahead of the latest technology in order to bring their organizations continued success. This advanced two-day course emphasizes the enterprise, sharpening your understanding of the best practices and procedures to use when deploying Citrix products in various environments.

This course targets Citrix Certified Administrators™ (CCAs) who seek comprehensive knowledge about Citrix servers and Citrix Installation Management Services or IT professionals who wish to extend their knowledge of server-based computing.

**Course Length** Two or three days

**Prerequisite** Successful completion of the Citrix® MetaFrame™ 1.8 (Windows®), Citrix MetaFrame 1.0 or 1.1 (UNIX®) or Citrix WinFrame® 1.8 Administration Course (CTX-302.2, CTX-3020, CTX-3021 or CTX-181); or a passing score on any of the Citrix Certified Administrator (CCA) exams

**Skills and Key Topics** At the end of this course, you will be able to:

- Publish applications across a firewall with Citrix Program Neighborhood™
- Load balance Citrix server farms across an ICA gateway
- Install Citrix Installation Management Services
- Deploy applications using Citrix Installation Management Services
- Understand application tuning and optimization
- Perform server optimization
- Implement policies and profiles
- Install SecureICA™ Services
- Restrict security settings
- Troubleshoot Citrix servers
- Capture and process a system trap

**Instructional Method.** Interactive presentation and application through labs and group activities

**Certification Preparation.** This is one of the courses that will prepare you for the Citrix Certified Enterprise Administrator™ (CCEA) exams
